INTERGOVERNMENTAL NEGOTIATING COMMITTEE
FOR A FRAMEWORK CONVENTION ON
CLIMATE CHANGE
Fifth session, second part
New York, 30 April-8 May 1992
Agenda item 3

COMPLETION OF A FRAMEWORK CONVENTION ON CLIMATE CHANGE

Technical review of the revised text under negotiation

Addendum

The present addendum contains the annexes referred to in document A/AC.237/Misc.21.

Annexes

I.	Consistency of terminology	3
II.	Comparison of principles with related elements of the preamble ...	12
III.	Research, information and education: comparison of relevant general commitments and articles 5, 6 and 7	19

ANNEX I

Consistency of terminology

Adequate, new and additional financial resources

- Preamble 10: "[...the provision to developing countries of **adequate, new and additional financial resources** [based on assessed contributions by developed countries]"
- Art. 4.2.2: "Developed country Parties [may provide on a voluntary basis]/[shall commit to the fund established under this Convention, through assessed contributions, **adequate, new and additional] financial resources**, [separate from agreed Official Development Assistance (ODA) levels] ..."
- Art. 4.2.4: "[(a) Developing country Parties shall [in accordance with the Objective and Principles stipulated in Articles 2 and 3 and in accordance with their national development plans, priorities, objectives and specific country conditions] [consider taking feasible]/[undertake] measures to mitigate climate change [through control of [their net] emissions of greenhouse gases [and maintenance and enhancement, where appropriate, of sinks and reservoirs]], [provided that the [agreed]/[full] incremental costs involved are met by the provision of **[new, adequate and additional] financial resources** from the developed country Parties].]"
- Art. 4.2.4: "[(b) Compliance with this Convention by developing country Parties will be dependent upon the effective implementation of the provisions of this Convention on **financial resources** and transfer of technology.]"
- Art. 8: "(f) [Provide policy direction and establish criteria [including priorities and selection of projects] for the functioning of the mechanism[s] for **financial resources and transfer of** [environmentally safe] technology]"
- Art. 8: [(j) Seek to mobilize **[new and additional] financial resources** in accordance with Article [4.2.2]]"
- Art. 10 (option 3): "[(a) ensure [the provisions of **adequate, new and additional financial resources** and transfer of technology on preferential and non-commercial terms for] the implementation of the decisions of the Conference of the Parties [by developing country Parties]]"

- Art. 14(1): Each Party [shall], [in accordance with its capabilities,] prepare, submit and periodically update a report containing the information [set forth in Annex II] including the measures it is taking to implement the Convention. [For developing country Parties, the fulfilment of this obligation will be conditional on the availability of corresponding **new and additional financial resources.**] [The availability of financial resources from the financial mechanism shall be contingent upon the full implementation of this obligation.]
- Annex II(1)(i)(option 1): "[Effective measures in fulfilment of obligations and specific commitments relative to the provision of **adequate, new and additional financial resources**, and access to and transfer of environmentally sound technology on a preferential and non-commercial basis, contributions to the financial mechanism of the Convention and description of programmes for technological cooperation]"
- Annex IV(1)(c): **"The financial resources of the Pool should be new, additional and adequate"**

Economies dependent on fossil fuels

- Preamble 19: "["Acknowledging the specific transitional difficulties of those countries, particularly developing countries, whose **economies are particularly dependent on fossil fuel** production, use and exportation, as a consequence of action taken on limiting greenhouse gas emissions and that these difficulties will need to be recognized in the development of protocols under this Convention]"
- Art. 4.3.1(h): **"countries whose economies are highly dependent on income generated from the production, processing and export, and/or on consumption of fossil fuels and associated energy intensive products"**
- Art. 4.4: "[The Parties shall, in accordance with Articles ... take into consideration, in the implementation of the commitments of the Convention, and in the adoption of concrete measures, the situation of Parties, particularly developing country Parties, whose **economies are highly dependent on the production and/or export of fossil fuels and associated energy intensive products and/or the use of fossil fuels** for which such Parties have serious difficulties in switching to alternatives.]"

Emissions

- Preamble 2: "[net] emissions"
- Preamble 12: "[excessively high per capita rates of anthropogenic carbon dioxide emissions]"
- Preamble 14: "emissions of greenhouse gases"
- Preamble 17: "[net emissions of developing countries]"
- Preamble 19: "greenhouse gas emissions"
- Art. 1: "'Emissions' means the release of greenhouse gases into the atmosphere [over a specified area and period of time.]"
- Art. 1: "['Net emissions' means the difference between the amount of a greenhouse gas released to and the amount removed from the atmosphere by all sources and all sinks, respectively, as created or modified by anthropogenic activities, taken over a specified area and period of time, as calculated by agreed criteria.]"
- Art. 2.1: "Net emissions of developing countries"
- Art. 2.3: "Anthropogenic carbon dioxide emissions"
- Art. 2.3: "emissions of greenhouse gases"
- Art. 2.8: "emissions of greenhouse gases"
- Art. 3(para. 2): "anthropogenic emissions of [all] greenhouse gases"
- Art. 3(para. 2): "net [carbon]/[greenhouse gas component] emissions
- Art. 4.1.1(b): "[net] emissions of greenhouse gases"
- Art. 4.1.1(k): "net emissions of greenhouse gases"
- Art. 4.1.1(l): "emissions of greenhouse gases"
- Art. 4.2.1(a): "anthropogenic emissions of greenhouse gases"
- Art. 4.2.1(a): "emissions of [carbon dioxide]/[the total of all greenhouse gases not covered by the Montreal Protocol"
- Art. 4.2.1(a)(alt.): "emissions of carbon dioxide and other greenhouse gases"
- Art. 4.2.1(a)(further alt.): "net anthropogenic emissions of greenhouse gases"
- Art. 4.2.1(a)(further alt.): "net emissions of carbon dioxide and other greenhouse gases not covered by the Montreal Protocol"
- Art. 4.2.1(e): "anthropogenic emissions of carbon dioxide and other greenhouse gases"
- Art. 4.2.1(e)(alt.): "[net] anthropogenic emissions of carbon dioxide and other greenhouse gases"

- Art.4.2.4(a): "[... net] emissions of greenhouse gases"
- Art. 10(Option 2)(d)(iii): "estimated [net] greenhouse gas emissions"
- Art. 10(Option 2)(d)(v): "estimated [net] greenhouse gas emissions reductions"
- Art. 12(Option 1)(alt. B)(2)(o): "emissions [of greenhouse gases]"
- Art. 17.3: "[net] emissions of [greenhouse gases] [carbon dioxide]"
- Art. 17.3: "estimated global [net] [carbon dioxide] [greenhouse gases] [emissions"
- Art. 17.5: "[net] emissions of greenhouse gases"
- Art. 24.1(option 2): "[net] emissions of greenhouse gases [CO_2]"
- Art. 24.1(option 2): "estimated total global net emissions"
- Art. 24.1(option 3): "[net] emissions of greenhouse gases [CO_2]"
- Art. 24.1(option 3): "estimated total global net emissions"
- Art. 24.1(option 4): "[net] emissions of greenhouse gases [CO_2]"
- Art. 24.1(option 4): "estimated total global net emissions"

Incremental costs

- Art. 4.1.1(b): "[subject in the case of developing countries to the provision of [agreed]/[full] incremental costs by developed country Parties]"
- Art. 4.1.1(c): "[subject to the provision of funding for developing countries of [agreed]/[full] incremental costs]"
- Art. 4.1.1(d): "[subject to, in the case of developing country Parties, their national development plans and programmes and the provision of [agreed]/[full] incremental costs involved]"
- Art. 4.1.1(e): "[on the basis of provision to developing countries of [agreed]/[full] incremental costs involved]"
- Art. 4.2.2: "[full]/[agreed] incremental costs of developing country Parties"
- Art. 4.2.4: "[provided that the [agreed]/[full] incremental costs involved are met by the provision of [new, adequate and additional] financial resources from the developed country Parties].]"

- Art. 12(Option 1)(alt.B)(possible add'l text): "The financial mechanism shall include a Climate Fund which shall be administered as a Trust Fund by the Global Environment Facility of World Bank/UNDP/UNEP. The Climate Fund shall meet on a grant or concessional basis the **agreed incremental costs** of developing countries referred to in Article . . .]"
- Art. 12(Option 2)(1): "**agreed incremental costs** of implementing this convention"
- Art. 12(Option 2)(2)(c): "**agreed incremental costs** of implementing this Convention"
- Art. 12(Option 3)(2)(a): "**full incremental costs**"
- Annex II(1)(Option 2)(h): "estimated gross and **incremental costs**"

Indigenous/Endogenous Technologies/Capacities

- Art. 4.2.3: "**endogenous capacities and technologies** in developing countries"
- Art. 5(2)(Option 1): "Parties that do not have the **indigenous capability** to undertake research and development will be ensured assistance in these areas.]"
- Art. 8(2)(m): "Consider questions [on cooperation related to **transfer of technology**] [**and endogenous capacity building**, in particular in developing countries;]]"
- Art. 11(3)(c): "**endogenous capacity building**"
- Art. 12(Option 1, alt. B)(2)(l): "Ensure the development of **endogenous capacity building** in developing country Parties, including technologies in the public domain"
- Art. 12(Option 3)(2)(o): "development of **endogenous capacity building**"

Interpretation/implementation/application of the Convention

- Art. 15.1: "**[interpretation or] implementation of the Convention**"
- Art. 16.1: "**Interpretation or application of this Convention**"

Enhancement of sinks and reservoirs

- Art. 4.1.1(d): "..**management** and enhancement.."
- Art. 4.2.1(a): "..**the protection** and enhancement.."
- Art. 4.2.1(e): "..**the enhancement**"
- Art. 4.2.4(a): "..**maintenance** and enhancement..."

Measures/policies/programmes/strategies

- Preamble 12: "... comprehensive **response strategies** at the global, national and [, where agreed, regional] levels which take into account all greenhouse gases, with due consideration of their relative contributions to the enhancement of the greenhouse effect and recognizing also that **strategies** required to understand and address climate change ..."
- [Preamble 21: "Recognizing that **climate policies** should be as cost-effective as possible in order to ensure maximum benefits from **measures** undertaken,]"
- Art. 2, para. 2: "**Measures** to guard against man-made climate change should be integrated into all relevant national development programmes ..."
- Art. 2, para. 9: "[**Climate policies** should be cost-effective to ensure global benefits at lowest possible costs. To achieve this, **climate policies** should be comprehensive, include all relevant sources and sinks of greenhouse gases, comprise all economic sectors, [include both limitation and **adaptation measures**] and may be implemented in cooperation with other Parties.]
- Art. 4.1.1(b): "Formulate, implement, publish, and regularly update national and where appropriate regional [**strategies and**] **programmes containing** [**nationally determined**] **measures** ..."
- Art. 4.1.1(d): "..**measures** against the degradation..**measures** to combat drought and desertification.."
- Art. 4.2.1(a): "..**measures** on mitigation of climate change..similar **policies and measures**.."

- Art. 4.2.1 (further alt. to subpara. (a) "... **national policies and ... corresponding measures**". These developed country **policies and measure** ..."
- Art. 4.2.1 (further alt. to (a): "..**measures** on the limitation of..greenhouse gases..country **policies and measures**.."
- Art. 4.1.1(d): "take **measures** [with the aim to elaborate **policies**] against the degradation of ecosystems"
- Art. 4.1.1(g)(i): "social, economic and environmental **policies** and actions.."
- Art. 4.1.1(g)(ii): "..**measures** taken by the Parties to mitigate or adapt to climate change"
- Art. 4.2.1(a): "The developed country Parties [as defined in ..] shall adopt national **policies** and take corresponding **measures** on [mitigation of climate change]/[the limitation of anthropogenic emissions of greenhouse gases.."
- Art. 8.2(i): "..exchange of information on, and the coordination, as appropriate, of **policies, strategies and measures** to address climate change"
- Art. 14.1: "..report containing the information [set forth in Annex II] including the **measures** it is taking"
- Annex II [Reporting 1(c) of option 1: "The **measures** it is taking to implement this Convention.."
- Annex II [Reporting 1(c) of option 1: "including ... **national [strategies and] programmes;**"
- Annex II para. 1 [(c)] of option 2: "**[measures] [national strategies] [policies]** ... to **mitigate** ... **to climate change;**"
- Annex II para. 1[(d): "... **measures and policies described under (c)]**"

Prerequisite/Essential

- Preamble 16 : "the improvement of the international economic environment..is **[essential]/[a prerequisite]** for enabling developing countries to participate effectively.."
- Art. 2.1(Principle 1): "Economic development is the **prerequisite** for adopting measures to address climate change"

- Art. 2.11(Principle 11): "The need to improve the international economic environment for the developing countries and to promote.. development are **prerequisite** for enabling countries to participate"

Scientific and other types of knowledge

- Art. 5.1: "..**scientific,[technological,]technical,socio-economic and legal knowledge** relevant to..climate change"
- Art. 6: "relevant **scientific,technological,technical,socio-economic and legal [available] information**"
- Art. 8.2(a): "The implementation and the evolution of **scientific knowledge**"
- Art. 11.3: "The state of **scientific knowledge on sciences....knowledge on sciences** related to climate change"

Technology transfer: Terms of transfer

- Preamble 10: "**technology transfer on [preferential, concessional and non-commercial]/[fair and most favourable] terms]**"
- Art. 4.2.3: "[assured] access to **[environmentally safe and sound] technologies**"
- Art. 4.2.3: "**[on concessional, preferential and most favourable terms]**"
- Art. 10(Option 3)((a): "**transfer of technology on preferential and non-commercial terms**"
- Annex II(1)(i): "**transfer of environmentally sound technology on a preferential and non-commercial basis**"

Technology transfer: Types of technologies

- Art. 4.2.3: "**[environmentally safe and sound] technologies**"
- Art. 5(2)(Option 4): "**environmentally safe technologies**"
- Art. 8.2(f): "**transfer of [environmentally safe] technology**"
- Art. 11(3)(Alt.A)(g): "**innovative, efficient and state of the art technologies and know-how**"

- Art. 12(Option 1, alt.B)(1): "**transfer of [safe and sound] technology**"
- Art. 12(Option 1, alt.B)(2): "**[safe] technology transfer**"
- Art. 12(Option 1, alt.B)(2)(h): "**environmentally sound and safe technologies**"
- Art. 12(Option 1, alt.B)(q): "**transfer of sound technology**"
- Art. 12(Option 3)(2)(k): "**environmentally sound and safe technologies** including those that have been neglected or displaced"
- Art. 12(Option 3)(2)(m): "**requisite technologies**"
- Art. 12(Option 3)(2)(o): "**technologies in the public domain**"
- Annex I(3)(d)(iii): "**technologies which are safe, rational and ecologically sound**"
- Annex II(1)(i): "**environmentally sound technology**"

ANNEX II

Comparison of principles with related elements of the preamble

Principles	Preamble
1. The right to development is an inalienable human right. All peoples have an equal right in matters relating to reasonable living standards. Economic development is the prerequisite for adopting measures to address climate change. The net emissions of developing countries must grow to meet their social and economic development needs.	2. Concerned that [net] emissions resulting from human activities are substantially increasing the atmospheric concentrations of greenhouse gases, and that these increases will enhance the greenhouse effect, resulting on average in an additional warming of the Earth's surface and atmosphere and may adversely affect natural ecosystems and humankind, whilst noting that there are many uncertainties in predictions particularly with regard to the timing, magnitude and regional patterns of climate change,
2. All States have a duty to aim at sustainable development for the benefit of present and future generations. Protection of the global climate against human induced change should proceed in an integrated manner with economic development in the light of the specific conditions of each country, [[without prejudice to the socio-economic development of developing countries]. Measures to guard against man-made climate change should be integrated into all relevant national development programmes [taking into account that [evolving] environmental standards] valid for developed countries may have inappropriate and unwarranted social and economic cocts in particular in developing countries [and countries with economies in transition]].	3. Aware that the adverse effects of such [potential] climate change [and measures to mitigate it] could have [serious] social, economic and environmental consequences,
	12. Recognizing the need for [all] countries [with excessively high per capita rates of anthropogenic carbon dioxide emissions] to take immediate action in a flexible manner on the basis of [short, medium and long term]/[clear priorities, as a first step towards] comprehensive response strategies at the global, national and [, where agreed, regional] levels which take into account all greenhouse gases, with due consideration of their relative contributions to the enhancement of the greenhouse effect and recognizing also that strategies required to understand and address climate change will be environmentally, socially and economically most effective if they are based on relevant scientific, technical and economic considerations and continually re-evaluated in the light of new findings in these areas,
	14. Recognizing that action to reduce emissions of greenhouse gases can also help in solving other environmental problems,

15. Affirming that response to climate change should be coordinated with social and economic development in an integrated manner with a view to avoiding adverse impacts on the latter, taking into full account the legitimate needs of developing countries which have at this time as their main priority the achievement of sustained economic growth and the eradication of poverty, and that therefore the promotion of economic growth in developing countries is essential to address the problems related to climate change,

17. Recognizing that all countries, especially developing countries, need access to [all the] resources required to achieve sustainable social and economic development and that in order to progress towards that goal, [the energy consumption of developing countries must grow, taking into account the need for greater energy efficiency]/[net emissions of developing countries must grow]

20. Bearing in mind the importance of integrating environmental concerns and considerations into policies and programmes in all countries [without introducing any form of conditionality in aid or development financing or constituting a pretext for devising new barriers to trade],

22. Determined to protect the atmosphere for present and future generations [on the basis of inter-generational as well as intra-generational equity],

Principles

[3. All States have an obligation to protect the [global] climate system for the benefit of present and future generation of humankind on the basis of [intergenerational as well as intragenerational] equity, and in accordance with [their]/[developed and developing countries] common but differentiated responsibilities and capabilities [with a view to achieving convergence [of anthropogenic carbon dioxide emissions] at a common per capita level] and taking fully into account that the largest part of emissions of greenhouse gases has been originating from developed countries [and those countries have the main responsibility] [and should take the lead] in combating climate change and the adverse consequences thereof.]

Preamble

4. Acknowledging that the global nature of such climate change calls for the widest possible cooperation by all countries and their participation in an effective and appropriate international response in accordance with [their respective responsibilities and capabilities]/[the means at their disposal and their capabilities] and their social and economic conditions,

10. Recognizing the need to strengthen international cooperation in addressing adverse effects of climate change [through the development within a global framework of appropriate policies [including the provision to developing countries of adequate, new and additional financial resources [based on assessed contributions by developed countries] and technology transfer on [preferential, concessional and non-commercial]/[fair and most favourable] terms], [the preparation of protocols on specific problems]/[the consideration of additional related instruments as may be agreed] and by means of increased research into atmospheric, terrestrial and marine ecology sciences as well as into the social and economic impacts of climate change and related response strategies, systematic observations, cooperation on scientific, technical, economic and legal matters and exchange of information],

22. Determined to protect the atmosphere for present and future generations [on the basis of inter-generational as well as intra-generational equity],

Principles

[4. The Parties shall give full consideration to the specific needs and special circumstances of developing country Parties, especially those developing countries that are particularly vulnerable to the adverse consequences of climate change and also those developing countries which would have to bear a disproportionate or abnormal burden under the Convention.]

Preamble

15. Affirming that response to climate change should be coordinated with social and economic development in an integrated manner with a view to avoiding adverse impacts on the latter, taking into full account the legitimate needs of developing countries which have at this time as their main priority the achievement of sustained economic growth and the eradication of poverty, and that therefore the promotion of economic growth in developing countries is essential to address the problems related to climate change,

18. Conscious that countries with low lying coastal, arid and semi-arid areas or areas liable to drought and desertification, small island countries and countries with fragile mountainous ecosystems are particularly vulnerable to the potential adverse impacts of climate change and will therefore require special consideration under this Convention and its [subsequent protocols]/[related legal instruments],

[19. Acknowledging the specific transitional difficulties of those countries, particularly developing countries, whose economies are particularly dependent on fossil fuel production, use and exportation, as a consequence of action taken on limiting greenhouse gas emissions and that these difficulties will need to be recognized in the development of protocols under this Convention.]

Principles

5. [Recognizing the need for] Parties to [the Convention shall] take [cost-effective] precautionary measures to anticipate [, prevent, attack] or minimize the causes of, and mitigate the adverse consequences of, climate change. [Where there are threats of serious or irreversible damage,] lack of full scientific certainty should not be used as a reason for postponing such measures.

Preamble

2. Concerned that [net] emissions resulting from human activities are substantially increasing the atmospheric concentrations of greenhouse gases, and that these increases will enhance the greenhouse effect, resulting on average in an additional warming of the Earth's surface and atmosphere and may adversely affect natural ecosystems and humankind, whilst noting that there are many uncertainties in predictions particularly with regard to the timing, magnitude and regional patterns of climate change,

[21. Recognizing that climate policies should be as cost-effective as possible in order to ensure maximum benefits from measures undertaken],

Principles

6. States shall promote an open and balanced multilateral trading system. Except on the basis of a decision by the Conference of the Parties which should be consistent with the GATT, no country or group of countries shall introduce barriers to trade on the basis of claims related to climate change.

7. Measures taken to combat climate change should not introduce trade distortions inconsistent with the GATT or hinder the promotion of an open and multilateral trading system.

Preamble

20. Bearing in mind the importance of integrating environmental concerns and considerations into policies and programmes in all countries [without introducing any form of conditionality in aid or development financing or constituting a pretext for devising new barriers to trade],

Principles

[8. Those [developed] countries [identified as] [[directly] responsible for causing damage to the environment through inducing climate change]/[which are mainly responsible for emissions of greenhouse gases into the atmosphere] should bear the responsibility for rectifying that damage [.[By openly demonstrating their direct responsibility or negligence, those countries]/[and] shall compensate for environmental damage suffered by other countries or individuals in other countries].]

Preamble

12. Recognizing the need for [all] countries [with excessively high per capita rates of anthropogenic carbon dioxide emissions] to take immediate action in a flexible manner on the basis of [short, medium and long term]/[clear priorities, as a first step towards] comprehensive response strategies at the global, national and [, where agreed, regional] levels which take into account all greenhouse gases, with due consideration of their relative contributions to the enhancement of the greenhouse effect and recognizing also that strategies required to understand and address climate change will be environmentally, socially and economically most effective if they are based on relevant scientific, technical and economic considerations and continually re-evaluated in the light of new findings in these areas,

Principles

[9. Climate policies should be cost-effective to ensure global benefits at lowest possible costs. To achieve this, climate policies should be comprehensive, include all relevant sources and sinks of greenhouse gases, comprise all economic sectors, [include both limitation and adaptation measures] and may be implemented in cooperation with other Parties.]

Preamble

12. Recognizing the need for [all] countries [with excessively high per capita rates of anthropogenic carbon dioxide emissions] to take immediate action in a flexible manner on the basis of [short, medium and long term]/[clear priorities, as a first step towards] comprehensive response strategies at the global, national and [, where agreed, regional] levels which take into account all greenhouse gases, with due consideration of their relative contributions to the enhancement of the greenhouse effect and recognizing also that strategies required to understand and address climate change will be environmentally, socially and economically most effective if they are based on relevant scientific, technical and economic considerations and continually re-evaluated in the light of new findings in these areas,

[21. Recognizing that climate policies should be as cost-effective as possible in order to ensure maximum benefits from measures undertaken,]

Principles

10. In all fields related to the protection of the climate system, the Parties shall respect and act in accordance with the principle of sovereignty of States, which is applicable in any area of international cooperation.

Principles

11. The need to improve the international economic environment for the developing countries and to promote their sustained economic development are prerequisites for enabling developing countries to participate effectively in the international efforts to protect the global environment including climate prtoection.]

Preamble

5. Recalling the pertinent provisions of the Declaration of the United Nations Conference on the Human Environment (Stockholm, 1972) and in particular principle 21 [which provides that "States have, in accordance with the Charter of the United Nations and the principles of international law, the sovereign right to exploit their own resources pursuant to their own environmental policies, and the responsibility to ensure that activities within their jurisdiction or control do not cause damage to the environment of other States or of areas beyond the limits of national jurisdiction" [and accordingly that environmental considerations should not be used as a pretext for interference in the internal affairs of developing countries]],

Preamble

16. Recognizing that the improvement of the international economic environment, thus promoting the economic growth and sustainable social and economic development, of developing countries, is [essential]/ [a prerequisite] for enabling developing countries to participate effectively in the international efforts to address climate change,

ANNEX III

Research, information and education: comparison of relevant general commitments and articles 5, 6 and 7

Scientific, Technical and Technological Research, Systematic Observation and Cooperation

Article 4.1

1(h) Promote and cooperate in scientific, technological, technical, socio-economic and other research, systematic observation and development of data archives related to the climate system and aiming to further the understanding and to reduce and clarify the remaining uncertainties regarding causes and effects of climate change and regarding the economic and social consequences of alternative response strategies, [in accordance with Art. 5];

Article 5

1. Each Party shall promote and cooperate in scientific, technological, technical, socio-economic and other research [and development], systematic observation and development of data archives related to the climate system and aiming to further the understanding and to reduce and clarify the remaining uncertainties regarding causes and effects of climate change and regarding the economic and social consequences of alternative response strategies [as elaborated in Annex 1].

Exchange of Information

Article 4.1

1(i) Promote and cooperate in the full, open and timely exchange of relevant scientific, technological, technical, socio-economic and legal information related to the climate system and climate change, and economic and social consequences of alternative response strategies, [in accordance with Article 6];

Article 6

In order to achieve the objective of the Convention, the Parties [shall] [may] facilitate and encourage, [taking into account the special circumstances of developing countries,] directly or [, as far as possible,] through [existing] competent international and intergovernmental organizations, full [, open] and timely exchange of relevant scientific, technological, technical, socio-economic and legal [available] information [as described in Annex ...]. [The Parties recognize that cooperation under this Annex has to be consistent with national laws, regulations and practices regarding patents, trade secrets and protection of confidential and proprietary information.]]

/...

Education, Training and Public Awareness

Article 4.1

1(j) Promote and cooperate in education, training and public awareness related to climate change and encourage the widest participation in the process, including by non-governmental organizations, [in accordance with Article 7];

Article 7

1. In order to increase the understanding of climate change [and the uncertainties surrounding it] and to facilitate appropriate responses, the Parties shall promote education, training and public awareness related to climate change.
